SUMMARY

Backend and full stack developer focused on Python, Django, FastAPI, SQL, and applied AI systems. Experienced in building REST APIs, backend workflows, dashboards, and computer vision applications using OpenCV and machine learning frameworks. Currently pursuing a Master's degree in Computer Science at the University of Vienna with specialization in Data Science.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java, HTML/CSS

Backend Development: Django, FastAPI, Flask, REST APIs, Authentication, Backend Workflows, WebSockets

Databases: Oracle SQL, PostgreSQL, SQLite, SQL Queries, Schema Design, Relational Databases

Machine Learning & Computer Vision: OpenCV, TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas, Image Processing, Object Detection, Classification

Testing & APIs: PyTest, Postman, JSON, API Integration, Request Handling

Frontend: React Basics, Responsive Design, JavaScript DOM Manipulation

Developer Tools: Git, GitHub, Docker, Linux, VS Code

Concepts: Object-Oriented Programming, Data Structures, Debugging, Modular Development

PROJECTS

Fatigue Detection System | *Python, OpenCV, Computer Vision*

- Developed a real-time driver fatigue detection system using eye tracking and head motion analysis.
- Built a webcam-based computer vision pipeline for detecting fatigue indicators from facial and head movement patterns.
- Completed as Bachelor thesis project with a final thesis grade of 9/10.

Document Validation System | *Python, OpenCV, OCR*

- Built a computer vision proof-of-concept for NFC terminal optical validation using LEDs, OCR, stabilization, and result logging.
- Designed image-processing workflow for structured validation and explainable detection outputs.

Django Chat Site | *Python, Django, Django Channels, WebSockets*

- Developed a real-time chat application using Django, Django Channels, and WebSockets.
- Implemented backend application logic for real-time communication and message handling.

IT Project KPI Tracker | *Python, Dashboard, Reporting*

- Built a dashboard for tracking deadlines, workload, overdue items, and project KPIs.
- Implemented reporting-oriented workflows for operational tracking and project visibility.

Garbage Classification | *Python, TensorFlow, Machine Learning*

- Developed an image classification system for categorizing waste images into material classes.
- Applied machine learning workflows for training and evaluating image classification models.

EXPERIENCE

Machine Learning Engineer Intern

Jun. 2025 – Dec. 2025

Skolyn

Remote

- Executed and monitored machine learning model training workflows using Python-based pipelines.
- Evaluated model outputs and validation results to analyze prediction consistency and training performance.
- Assisted with testing and verification of model predictions across experimentation workflows.

Co-Founder & Web Developer

Oct. 2023 – Mar. 2025

CWB Startup

Hybrid

- Co-founded a startup focused on university-oriented digital platforms and web solutions.
- Developed web applications using backend, frontend, and deployment workflows.
- Implemented backend functionality for routing, data handling, and application logic.

Python Mentor Assistant

Aug. 2024 – Dec. 2024

Freelance

Remote

- Assisted students with Python fundamentals, object-oriented programming, debugging, and backend development concepts.
- Supported practical training involving Flask, Django, JSON handling, and application structure.

Front-End Mentor Assistant

Apr. 2024 – Aug. 2024

Freelance

Remote

- Supported students in frontend fundamentals, responsive design, JavaScript, APIs, and JSON handling.
- Helped students understand component-based frontend development and browser-side application behavior.

EDUCATION

University of Vienna

Vienna, Austria

Master of Science in Computer Science, Specialization in Data Science

Oct. 2025 – Jul. 2027

Riga Technical University

Riga, Latvia

Bachelor of Science in Computer Science

Sep. 2022 – Jun. 2025

- Bachelor thesis: "Development of Computer Vision System for Fatigue Detection Using Eye Tracking and Head Motion Analysis."
- Thesis grade: 9/10.

Vilnius University

Vilnius, Lithuania

Erasmus+ Exchange Program, Computer Science

Feb. 2024 – Jun. 2024
